

Our School

Miejski Zespół Szkół nr 6 w Gorlicach
im. Bohaterów Ziemi Gorlickiej

Our School from a bird's eye view.

Polish Educational System- what you need to know.

The Polish School starts at the age of 6 and ends at the age of 15. In order to enter, a child must have already had a year of formal education (reception). At the end of school (8th Grade) the students take an exam to determine to which secondary- school they will be accepted. After 4-6 years of secondary school there is a final exam before going to university or ending education all together.

REDMI NOTE 9T

Music

Classes 0-7 have music classes once a week. It helps children to get better at singing and playing instruments. We learn about famous musicians such as Frederic Chopin and how music changed over time. This subject helps children uncover their talents and hobbies, as well as bringing lots of joy.

Art

Art is also taught in classes 0-7 once a week. Everyone enjoys it, as it gives a break from thinking and lets you get creative. During the lesson, we learn about many different ways to create art. The teacher helps us get better at drawing, by showing us many simple but effective techniques.

Technology Class

Students have tech. class for 3 years (4-6), during which they learn how to build small, things, the general build of a house and much more. It is very useful for students, who after primary school want to go to technical school. Thanks to this class we also get out bicycle card, with which we can drive on the road.

ICT

It is taught from the 4th grade all the way until the end of school (8th grade). We learn about basic programming and what a computer is made of.

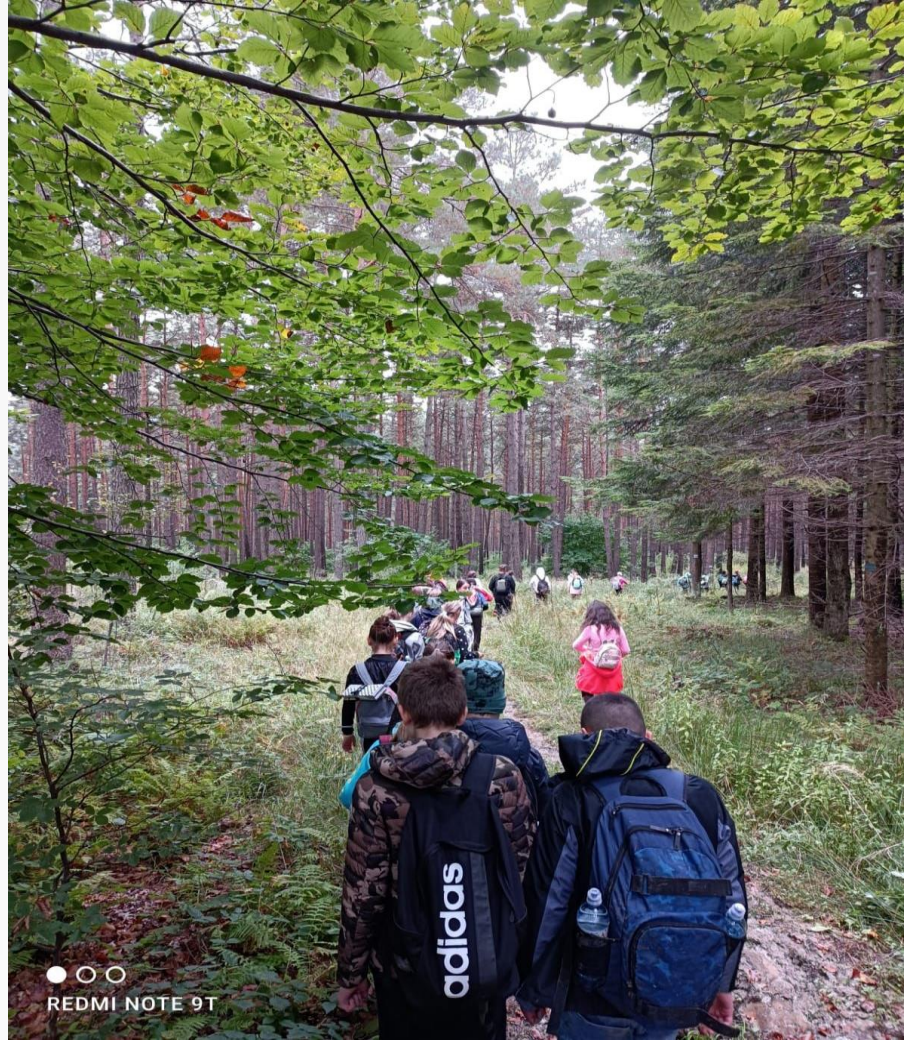

Geography

During Geography, we learn all kinds of things about the world. From countries economy to the tallest mountain peaks. Geography lessons are once a week, from 5th-8th grade.

Biology

During Biology lessons, we learn about all living things as the name indicates *lat. Bio - life logia - study*. We spend the most time learning about the human body. Its cells, systems and so on.

Chemistry and Physics

Chemistry and physics are taught by the same teacher to the 7th and 8th grades. We are taught only the most basic stuff, since we have a lot to learn and only 2 years.

Languages (English, Polish and German)

All the languages are taught in very similar ways. In our school we learn Polish from the very beginning of school, English from 4th grade, and German from 7th grade. Our school is very patriotic, so we hold many memorials of important moments in our countries history such as The first Constitution.
